

Raweeroj Thokaeo

JUNIOR FULL STACK DEVELOPER

raweeroj.tk@gmail.com | 092-257-4733 | Bangkok, Thailand

SUMMARY

Recent graduate from King Mongkut's Institute of Technology Ladkrabang (KMITL) with hands-on full-stack development experience gained through an internship and an academic thesis project. Comfortable working across the stack — from database design and API development to server deployment with Docker, Nginx, and CI/CD. Looking to grow as a Full Stack Developer on a product engineering team.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL
Frameworks: Node.js, Express.js, Next.js (React)
Databases: PostgreSQL, MongoDB, MySQL, Supabase
DevOps / Tools: Git (Version Control), Docker, Nginx, Jenkins (CI/CD), Shell Scripting, Grafana, Linux (Ubuntu) server administration

WORK EXPERIENCE

Clicknext Co., Ltd. — Junior Full Stack Developer Apr 2024 – Aug 2024

- Maintained and upgraded a legacy web application (PHP, Ajax, MySQL) used to manage community meetings for juristic offices and residents across roughly 1,000 villages in Land & House housing projects.
- Integrated new API endpoints into the existing legacy system per client requirements, preserving the interface residents and staff already relied on.
- Built a new page, revised navigation menus, and adjusted page layouts to meet client requests; wrote and optimized MySQL queries to support new functionality.
- Configured Docker environments to pin a legacy PHP version and resolve version-compatibility issues.

Epic Consulting Co., Ltd. (Outsourced to AIS) — Technical Support May 2025 – Nov 2025

- Monitored and supported Gateway infrastructure for AIS services (e.g., USSD) as part of the Operations team.
- Analyzed system logs to identify root causes of service errors and escalated issues to the relevant engineering teams.
- Wrote Shell scripts to automate log analysis and fed processed data into Grafana dashboards for real-time monitoring.
- Managed patching for assigned servers/applications and coordinated new service deployments to minimize risk.

ACADEMIC PROJECT

Cozy Care — Caregiver Booking Platform (Senior Thesis, Team of 4) 2023 – 2024

- Designed a two-sided marketplace connecting Caregivers and Patients with registration, real-time chat, distance-based search, GPS pin-drop, and job posting/tracking/closing workflows.
- Designed the full database schema and independently built all backend REST APIs; integrated the APIs with the frontend and adjusted layouts for several pages.
- Set up and administered the Ubuntu production server, configured Nginx as a reverse proxy, issued SSL certificates, and built a Jenkins CI pipeline to automate builds and testing.

EDUCATION

King Mongkut's Institute of Technology Ladkrabang (KMITL) Graduated 2024
Bachelor of Engineering (B.Eng.), Computer Engineering, Faculty of Engineering • GPA: 3.11

LANGUAGES

Thai — Native | English — TOEIC 570
